An initiative of the Community Advisory  
Committee of Crisis & Counseling Centers

Have you ever thought about what happens to your pet in an emergency situation? That answer is easy. Who thinks about “Ziggy” or “Stubby” when we can’t be at home? A.W.A.R.E. wants to suggest things you might keep in mind to prepare for the unexpected.

## **A.W.A.R.E.**

is about caring for yourself by caring for your pet. What happens during an emergency when you can’t be at home? Plan the care for your pet with someone you trust.

### **THE PLAN**

Step 1 - Arrange for a contact person you trust. Step 2 - Review the following with your contact person: (a) where the pet(s) is going to stay (b) food & med requirements and (c) vet & shot updates.

Give clear written instructions to your contact person. Fill out the information sheet we’ve provided in this brochure and post it on your refrigerator and/or put a copy in your wallet. Make periodic checks on pet carriers and other pet support items.

### **TAKE ACTION**

Try to arrange a review of the steps needed with your contact person and be certain he or she is comfortable with the role they might have to play to help you. We all want what’s best for our pets.

**“BE PREPARED”**

Clip these out and hang one on your refrigerator and keep the other in your wallet.
